

# Galvanizing in Cars

## Round Table

Dec 21 ,2015

*We all love our cars !*

*We all need our cars....*

*Sometimes more than  
our Girlfriend !*

# Agenda

- ☐ Car coatings : Present Status
- ☐ Galvanizing : Value proposition
- ☐ Cost benefit
- ☐ Case Study : US Light weighting challenge
- ☐ Hyundai Success Story
- ☐ IZA GAP program
- ☐ IIT Mumbai Study on Indian Cars : Gravity of the problem
- ☐ Role of Hindustan Zinc Ltd
- ☐ Open house

# Galvanizing in Indian Automobiles

A joint initiative by

**Hindustan Zinc Ltd**

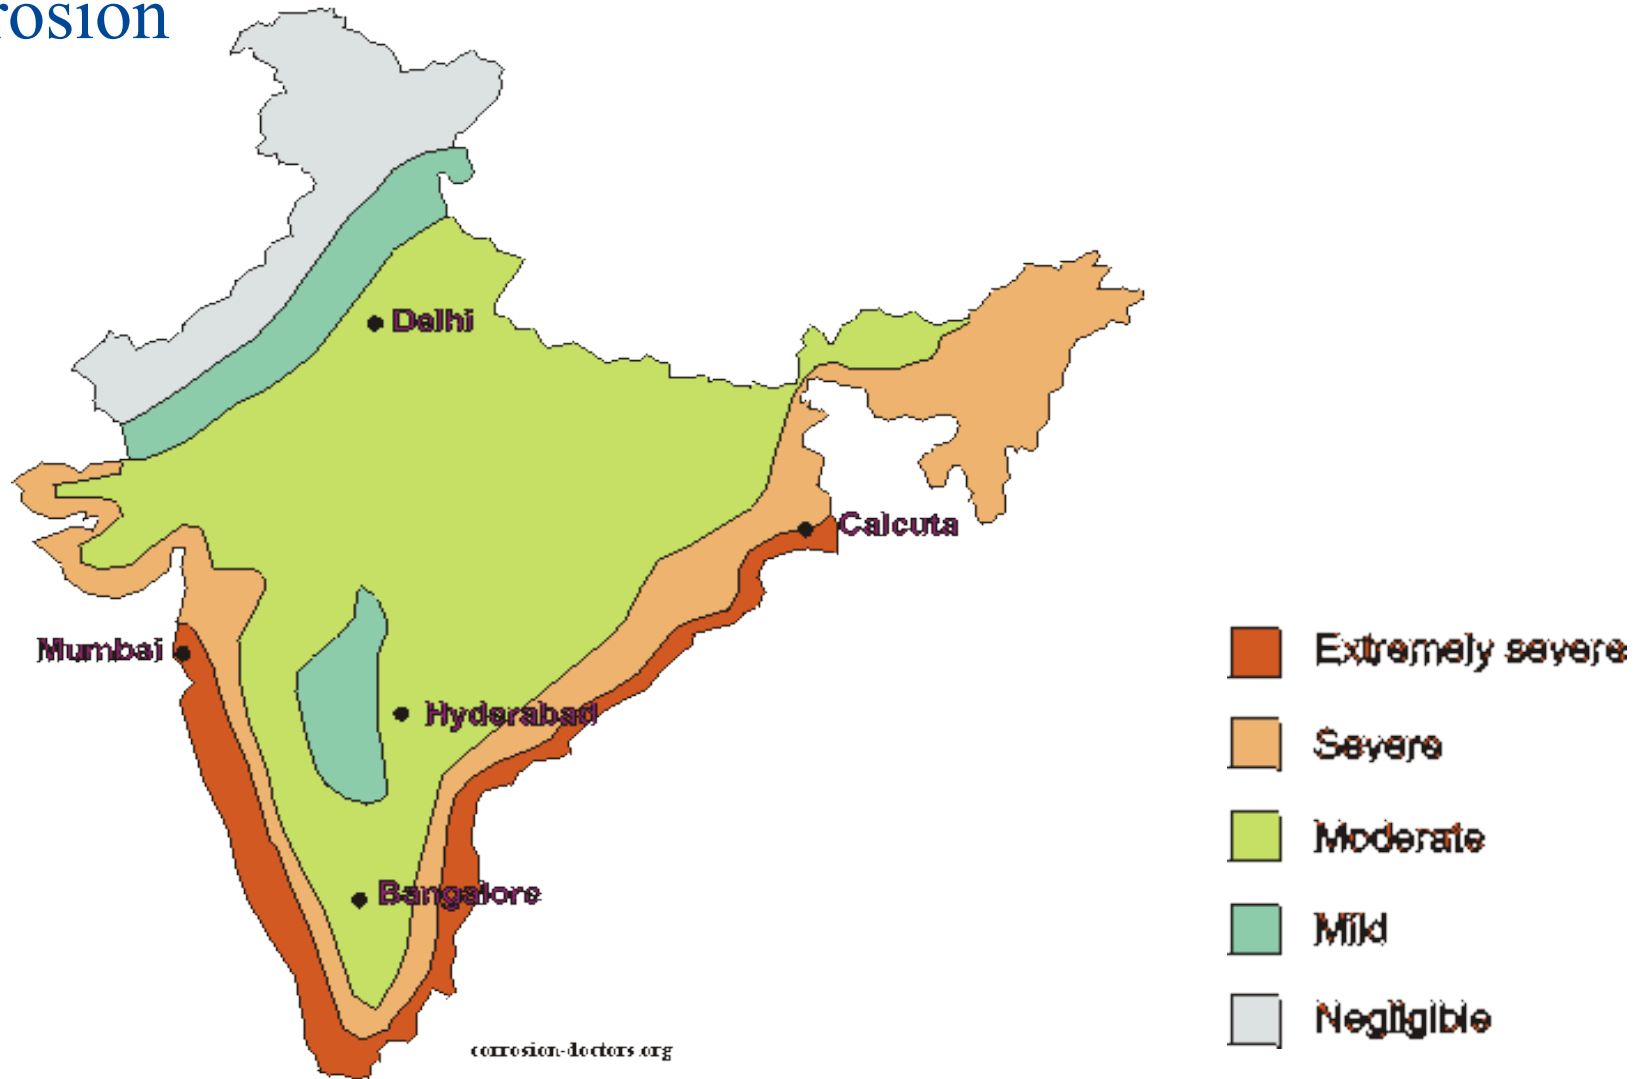

**International Zinc Association**

*Car buyers in Europe, North America, Korea and Japan have long benefitted from unique protection warranties for decades..... Isn't it time for **Indian consumers** ?*

- 1 India is the 6<sup>th</sup> largest car manufacturer in the world
- 2 Global standards are : Anti perforation warranty for up to 12 yrs
- 3 Galvanizing : The right Starting material for perforation warranties
- 4 Improved Safety performance of the car
- 5 Leads to weight reduction & reduced emissions
- 6 Improved fuel efficiency
- 7 Reduction in TCO/ Life Cycle cost

In India more than 5% of GDP is lost every year to corrosion

*Cars are no exception to corrosion!*

# Automobile Industry: Present Scenario

- Galvanized steel has been used for decades in Europe, NA, Japan & Korea for body panels and anti perforation warranties are very common
- Indian cars are made from Coated Steels, give the look and feel of International cars, but do not give anti perforation warranties
- India has started using galvanized and galvaneal steel for body panels, but only for export models

**For Exports, 70% of body in white (blue) is galvanized**

**Domestic models, 3% is galvanized, in new models up to 20% is galvanized**

# How Galvanizing leads to anti Perforation Warranties

- **Galvanizing is a controlled coating of Zinc on Steel in order to protect it from Corrosion**
- **Zinc sacrifices itself to protect the strength and safety of steel in the automobile body in white**

## 12 year anti-corrosion & perforation warranty

12 year unlimited mileage cover\* that protects against rust perforation affecting sheet metal body panels as a result of a manufacturing fault. This warranty can also be transferred to any future owner throughout the 12 year period.

\*Light commercial vehicles (Hilux and Proace) subject to 6 year anti-corrosion and perforation warranty.

*Galvanized Steel :  
The right  
**STARTING**  
**MATERIAL** for  
car bodies*

### Structural Corrosion Warranty (12 Years)

Honda warrants that the Honda car specified on your Warranty Certificate is free from corrosion from the inside to the outside of body panels for the period of 12 years unlimited mileage from the "Warranty Start Date" as specified on your Warranty Certificate.

*During this period Honda will rectify, free of charge, any such defects found on the car, subject to the Warranty conditions in your Service Book.*

## Est. Cost – Benefit Analysis

*The overall benefit to the automaker to convert a 400 kilogram car body-in-white from cold rolled steel to galvanneal is estimated to offset the higher material and processing cost*

| Factor                                  | Cost estimate (INR/car) | Factor   | Cost Benefit (INR)       |
|---|-------------------------|--|--------------------------|
| 50G/50G coated steel for entire BIW     | 4,500                   | Resale of large offal (body sides, doors) to appliance, IT & construction  | 600 (25%)                |
| Shorter welding tip life & tip dressing | 2,500                   | 50% reduction in warranty claims   | 750                      |
| Higher utility costs for welding (kwh)  | 2,000                   | Reduced usage of waxes, sound absorption epoxies, and lower housekeeping costs   | 240                      |
| More frequent die maintenance           | 4,000                   | Warranty extension marketing opportunity   | Potential revenue stream |
| Additional body shop finishing          | 1,000                   | Market share protection  | Soft benefit             |
| Extra Zn phosphate consumption          | 500                     | CAFÉ improvement through lighter BIW as a result of item 3   | 240                      |
| <b>TOTAL COST EXTRA</b>                 | <b>14,550</b>           | Improved car inventory control at assembly line (no difference in domestic vs. export models)  | 200                      |
|   |                         | Opportunity to generate new revenues by eliminating need by consumer to buy aftermarket undercoating, UV “Permashine” paint protection | 10,000                   |
|   |                         | No annual inspection requirements by car buyer   | 2500                     |
|   |                         | <b>TOTAL COST BENEFIT</b>  | <b>14,530</b>            |

*\* Industry Estimates*

# All this at what cost ?

## Benefits of Galvanizing

Corrosion resistance / Anti perforation warranties

Very low maintenance / annual inspection

## Cost

0.02% of the cost of the car

One time cost with minimum maintenance / touch up

| Costs in INR / car |            | Non Galvanized                                      | Galvanized |  |
|--------------------|------------|---|------------|--|
|                    | Est. Price | Towards   | Est. Price | Towards  |
| Year 1             | 7000       | Initial coatings (Teflon/ UV protection/ Underbody) | 9000       | Galvanized   |
| Year 2             | 1000       | Maintenance   |            | Anti perforation / surface rust warranty up to 5 years |
| Year 3             | 3500       | Repeat teflon                                       |            |  |
| Year 4             | 1500       | Maintenance   |            |  |
| Year 5             | 3500       | Repeat teflon                                       |            |  |
| Year 6             | 2500       | Maintenance   | 1000       | Only touch up  |
| Total Cost : 6 yrs | 19,000     |   | 10,000     |  |

# The Road Ahead

Learning from International Auto makers

# The Road Ahead

Cooperative Initiatives:

- ❑ World Steel Future Steel Vehicle
- ❑ IZA Galvanized Auto body Partnership (GAP)

## FutureSteelVehicle

- 1.State-of-the-future development process
2. 177 kg body structure mass - *39% mass reduction*
- 3.97% use of HSS and AHSS
- 4.Nearly 50% GigaPascal steels
- 5.Enables 5-star safety ratings
- 6.Nearly 70%Total Lifetime Emissions Reduction
- 7.Mass savings at no cost penalty
8. Near-term production-applicable solutions

# Reduction in Emissions & Light Weighting Go Hand in Hand

**Material Production GHG** comparison for a functionally equivalent component - **example**

|                              | Mid-Range CO <sub>2</sub> e | Estimated Part Weight (kg) | (kg CO <sub>2</sub> e) |
|------------------------------|-----------------------------|----------------------------|------------------------|
| Mild Steel                   | 2.3                         | 100                        | 230                    |
| Advanced High-Strength Steel | 2.3                         | 75                         | 173                    |
| Aluminium                    | 11.3                        | 67                         | 757                    |
| Magnesium                    | 46.0                        | 50                         | 2300                   |
| Carbon FRP                   | 22.0                        | 45                         | 990                    |

*Use of Advanced High Strength Steel (AHSS) leads to significantly lower emissions*

*How much weight reduction can steel provide?*

# Reduction in Emissions & Light weighting Go Hand in Hand

USA CAFE regulations (54.5 mpg by 2025)  
Similar for Europe: 95g/km of emissions by 2021

*Calls for more use of  
Advanced Steel*

# Reduction In Emissions & Light Weighting Go Hand In Hand

**HYUNDAI**

NEW THINKING.  
NEW POSSIBILITIES.

*i40*

Product Concept / BIW Concept

## *Weight optimization*

- Achieved a 7.6% reduction in BIW weight compared to predecessor.

- MS (120 – 280 MPa)
- HSS (180 – 640 MPa)
- AHSS (220 – 720 MPa)
- UHSS (620 – 1280 MPa)
- PHS (980 -1260 MPa)
- Fibre reinforced plastic

# Lower TCO and Improved Fuel Efficiency

**HYUNDAI**

NEW THINKING.  
NEW POSSIBILITIES.

**i40**

Product Concept / BIW Concept

## Efficiency

### Strong TCO performance through:

- High residual value
- 5-year triple care program
- Competitive RCAR performance

### Total cost of ownership:

#### Aerodynamics

#### Fuel efficiency

Hyundai Sonata at GDHS Conference 2013

Product Concept

# Future Ready Cars: Improved Safety with High Strength Steel

NEW THINKING.  
NEW POSSIBILITIES.

i40

Product Concept / BIW Concept

## Safety EuroNCAP rating

TEST 2011

92%

ADULT OCCUPANT

86%

CHILD OCCUPANT

43%

PEDESTRIAN

86%

SAFETY ASSIST

Side impact 8pts

Front impact 14.2 pts

Pole impact 7.6 pts

Pedestrian  
Protection  
16 pts

### EuroNCAP comments:

- Driver knee airbag is standard equipment
- Maximum score for side barrier impact
- Bumper area scored maximum points for pedestrian protection
- Speed limitation assistance is standard equipment for best selling variant

# IZA GAP program & GAP Members

19 Global Steel Companies

7 Equipment Suppliers, 1 Automaker, and IZA Members

Funding of USD 1Mn +

# The Indian Perspective

Learnings from study by IIT Bombay

# Corrosion in Indian Cars

Schematic diagram of car panels used for survey  
R-Rust, B- Blister, I - Imperfection

- The surveys involved inspecting ~ 500 passenger vehicles (less than INR 10 Lakh) ranging in age from 5-10 years old
- The parking lot survey methodology used in conduction this project was similar to that used in previous work conducted in North America in the 1990s
- This allowed comparisons to be made from the North American surveys and this particular Indian Survey
- Coastal areas in Mumbai were chosen for the survey with high density of passenger cars
- Corrosion imperfection categories were : **Blisters, Surface Rust & Imperfections**
- Car body exterior was examined and 4 major corroded areas emerged : **Bonnet** (hood), **Boot** (deck lid) or Hatchback, **Rocker** (Sill) Panel, **Door panels** around the handles

# Survey Findings

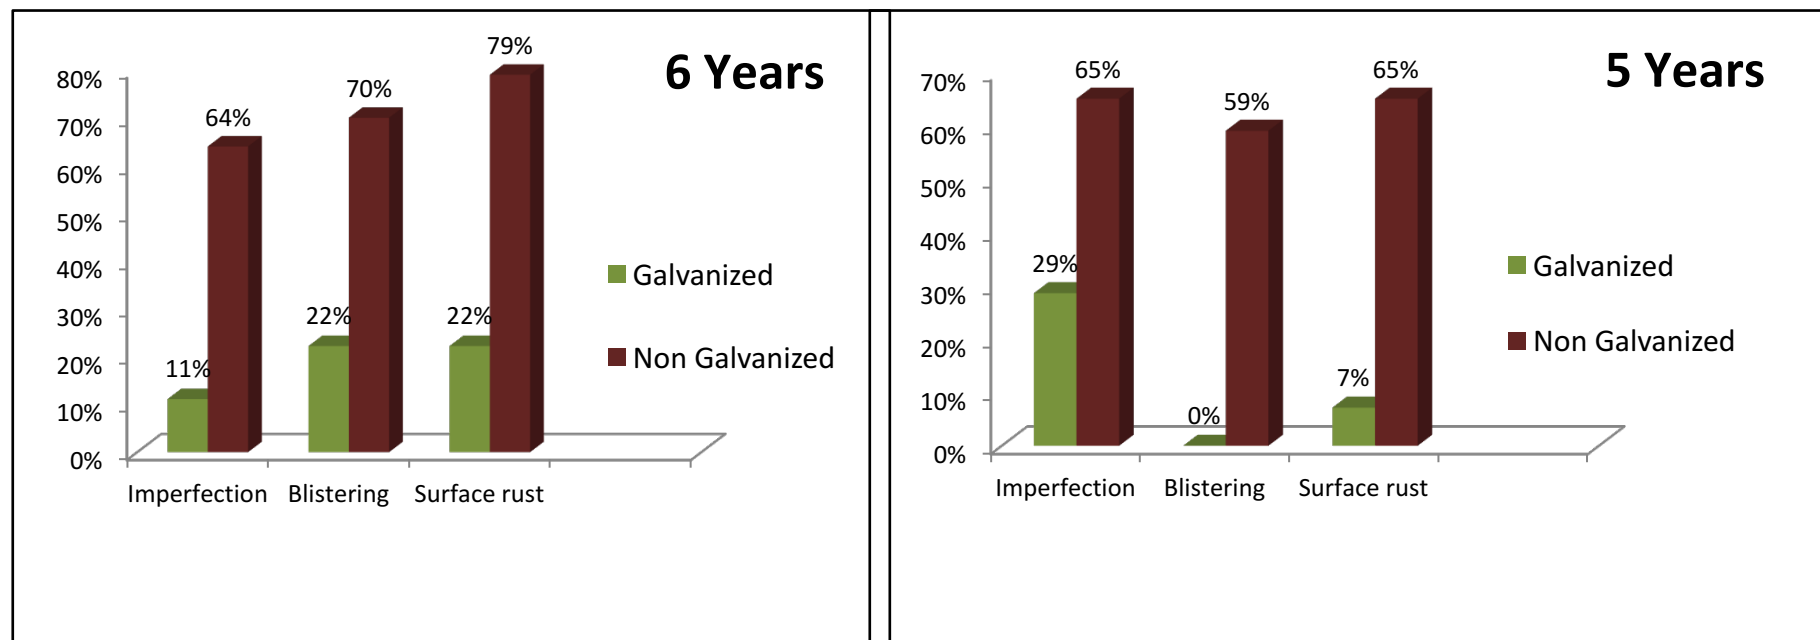

- Graphical representation of the survey summary according to approximate ages, quantity (% of car inspected) and imperfection type
- Significant increase in imperfections after vehicle age of 5 years & above

|                     | Imperfection |     | Blistering |     | Surface Rust |     | Perforation |    |
|---------------------|--------------|-----|------------|-----|--------------|-----|-------------|----|
|                     | No.          | %   | No.        | %   | No.          | %   | No.         | %  |
| Door Handles        | 124          | 27% | 134        | 29% | 110          | 24% | 9           | 2% |
| Bonnet              | 117          | 26% | 126        | 28% | 180          | 39% | 4           | 1% |
| Boot or Hatchback   | 83           | 18% | 92         | 20  | 129          | 28% | 8           | 2% |
| Rocker (Sill) Panel | 145          | 32% | 159        | 35% | 183          | 40% | 4           | 1% |

Quantity (No.) and Percentage (%) of vehicles exhibiting imperfection for various parts of the vehicle

# Survey findings: Galvanized (Small set) vs Non Galvanized

- ❑ *Galvanized cars show significantly improved performance (nearly 60%-70%) as compared to non-galvanized cars of the same model year*
- ❑ *These results signify the importance of galvanization in automotive steel*

# Gravity of the Problem

5+ year old cars on Indian roads today

More than 60% have a problem of surface rust

27 Lakhs

## Surface Rust

Reduces steel strength ; a concern for car safety  
Reduces fuel efficiency; causes more emissions

# Impact on Indian Automobile Industry

- ☐ **India is all set to become the fourth largest automotive producer in the world by 2020**
- ☐ **Automotive sector is the second largest market for steel consuming about 10million tons of steel and will only grow in coming years**
- ☐ **With the increasing demand of automotive vehicles, there will be a growing demand of steel, which forms nearly 70% of the whole car body weight**
- ☐ **The performance and longevity of these steel parts will be an important factor to gauge the overall performance of these automotive vehicles.**
- ☐ **With these trends, it is imperative to focus on quality and reliability of the automotive body steel parts, and hence its overall performance**

# Leading the Way

## Hindustan Zinc Limited

Leading global producer of zinc-lead

Vedanta Group company in zinc-lead-silver business

**1st Rampura  
Agucha Largest**  
zinc mine globally.

**2nd** Largest zinc-lead  
miner globally with:  
**9 million+ MT** of ore  
production capacity

### Core Strengths

- Reserves & Resources base of 365.1 million MT ensuring mine life of 25 year
- Integrated metal production supported by captive power plants
- Low cost of operations driven by quality assets and multi-metal recovery
- Market leadership in India with strong presence in emerging economies of Asia

# Sustainable Development

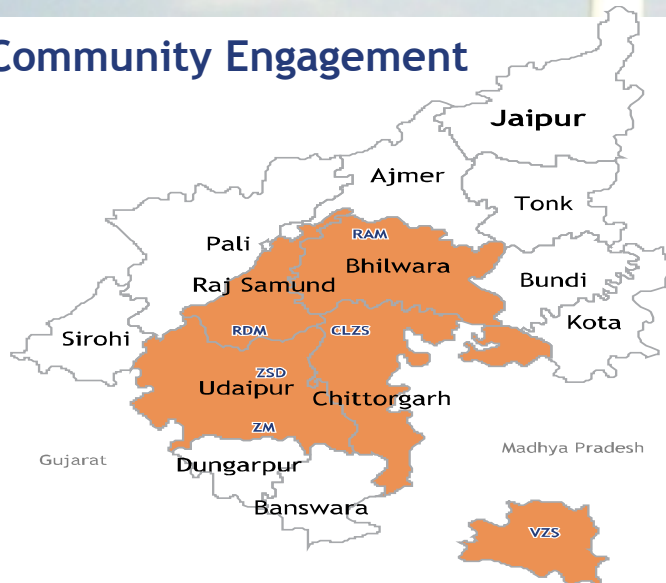

## Green Energy

HZL is one of India's largest wind power producers with a generation capacity of around 274 MW

Registered under the United Nations Framework Convention on Climate Change's (UNFCCC) Kyoto Protocol for Clean Development Mechanism (CDM)

Total annual certified emission reduction (CER) potential of over 497,000 MT of CO<sub>2</sub>

## Community Engagement

### Fostering Self-Reliance through Community Development

- Reaching to more than half a million people in Rajasthan
- Positively impacting lives of more than 100,000 families in 358 Villages in Rajasthan
- Members of United Nations Global Compact (UNGC), TERI-BCSD (Business Council for Sustainable Development) and National Population Stabilization Fund

- CSR initiatives undertaken on local needs of the community focusing on:
  - Health & Nutrition
  - Education
  - Water & Sanitation
  - Sustainable Livelihood
  - Agriculture & Livestock Development
  - Women Empowerment

# Diverse Product Portfolio

## Zinc

- Special High Grade (SHG) 99.995% under (4 LME registered Brands)
- **Continuous Galvanising Grade (CGG) for Automotive Steels**
- High Grade (HG) 99.95%
- Prime Western (PW) 98.65%

## Lead

LME registered under the brand name of "Vedanta 99.99".

## Silver

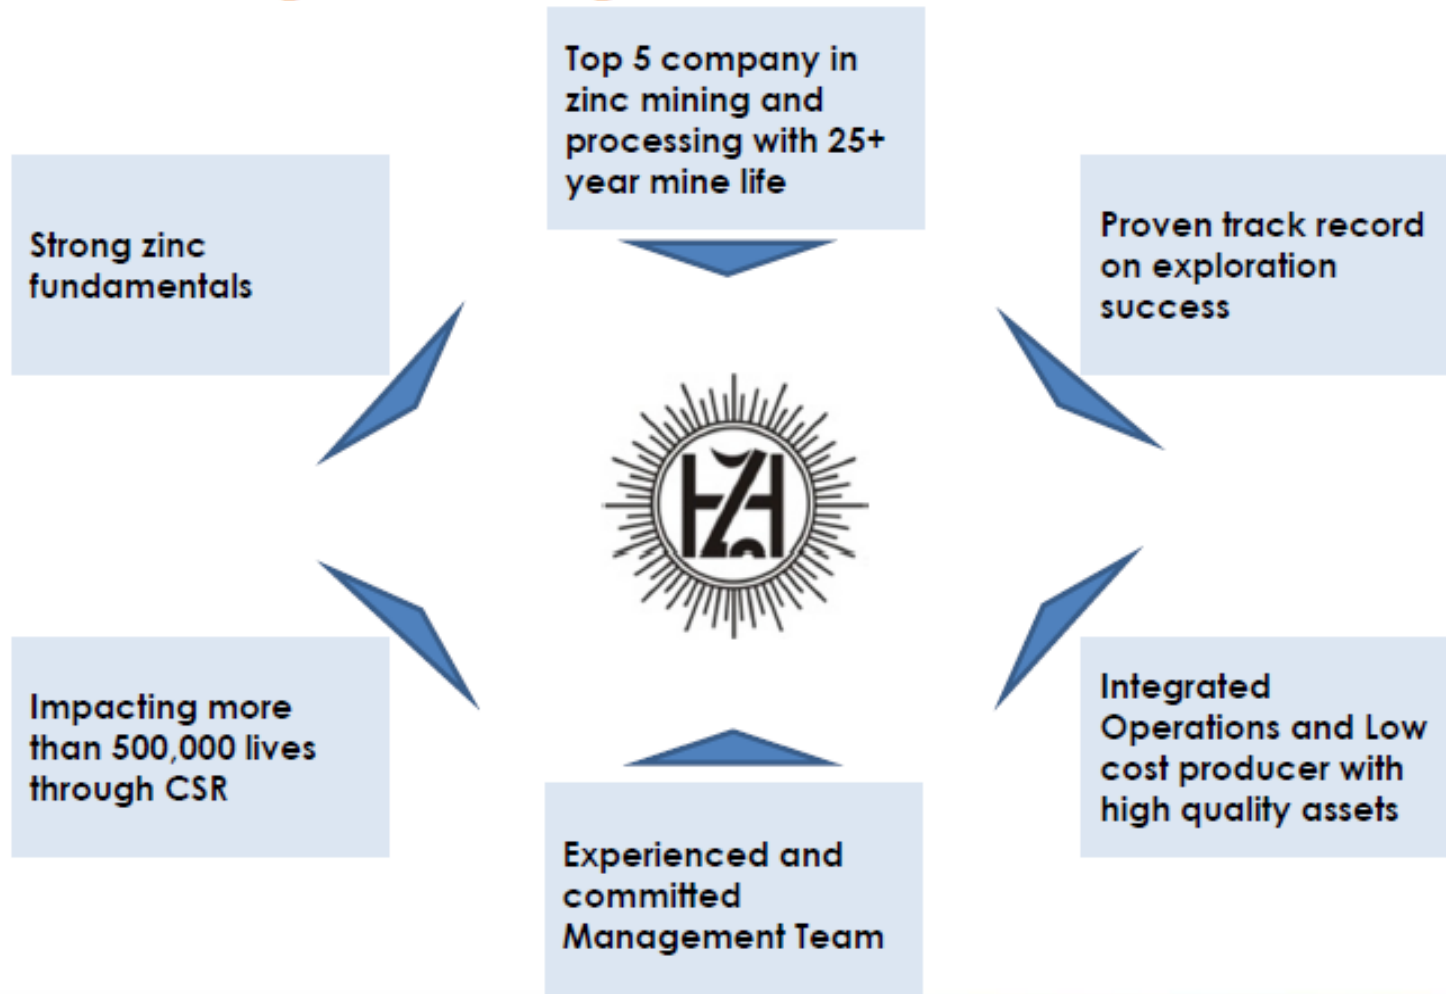

(99.9% purity). It is casted in the form of bricks weighing 30 kgs.

## Cadmium

Having a minimum purity of 99.95% to 99.99%; it is casted in the form of pencils weighing from 250 gms to 500 gms.

# Delivering consistent value to shareholders

## *Delivering consistent growth and value to stakeholders*

# Zinc in Everyday life

*Zinc in Infrastructure*  
*Zinc in Agriculture*  
*Zinc builds Nation*

*Zinc in Automobile*  
*Zinc in Household items*

*Zinc Saves Lives*  
*Zinc Protects Health*  
*Zinc Gives Strength*

*We All Need Zinc*

# Supporting Key initiatives towards Sustainability in Indian Ecosystem

Associations are key advisors to BIS / Ministry for Code specifications

## International Zinc Assn.

- Sustainability
- New Applications
- International Resources

## India Lead Zinc Development Association

- Local Technical Assistance
- Wide Indian Membership

### First Use Expertise

Galvanized Steel, Die casting Alloys, Zinc Oxides etc

General Galvanizing, Lead Acid Batteries

### End Use Expertise

**Automobile**, Construction, Fertilizers, Railways, Highways, Metros etc

Construction, Public Infrastructure , Power Transmission

### Sustainability

Zinc Saves Kids, Zinc in Nutrition, Zinc in Fertilizers etc

Battery Recycling ; Clean Environment

### Tools

Conferences, In house seminars, exhibitions, e-library, website/ case studies

Directories, Conference, Exhibitions, Local Office

### Engagement

Zinc users, Regulators, Ministries, stakeholders, Professors, Architects, Consultants etc
